Purpose

In late 2019 and early 2020, Australia was ravaged by a horrifically devastating bushfire season that perished an estimated half-billion living creatures and caused toxic smoke clouds to cover populated cities. The heaviest hits were rural communities and farms, including one organic honey producer that lost over 500 beehives in one tragic day.

Honey Homage, located in eastern NSW had lost almost everything, but through pure grit, patience, and sheer determination following the fierce bushfires; has now cultivated new hives and is now in a position to start selling their organic honey products again.

Being an organic honey producer for almost 60 years, they relied on reputation, word of mouth and repeat wholesale customers to move their products. They don't have an online presence or modern website and because of the bushfires and having to stay out of the market to re-grow; they have become forgotten within the market.

As a passionate team of three with a broad skill set that includes digital marketing, brand identity, design, and full-stack web development; our purpose is to bring Honey Homage online onto a digital market with an optimised online store.

Functionality / Features

Website:

- Stripe Payment System
- Buyer Login System
- Admin Login System
- Add to Cart & Checkout System
- Beautiful and Engaging Frontend
- User Focused UX and UI

Digital Marketing:

- Link to Social Media Channels
- Google Adwords
- Search Engine Optimisation

Design:

- Custom Logo
 - Custom Marketing Materials
 - Custom Graphics
-

Target Audience

- Local community
 - Bulk-buying customers
 - Aim to reach all of Australia
-

Tech Stack

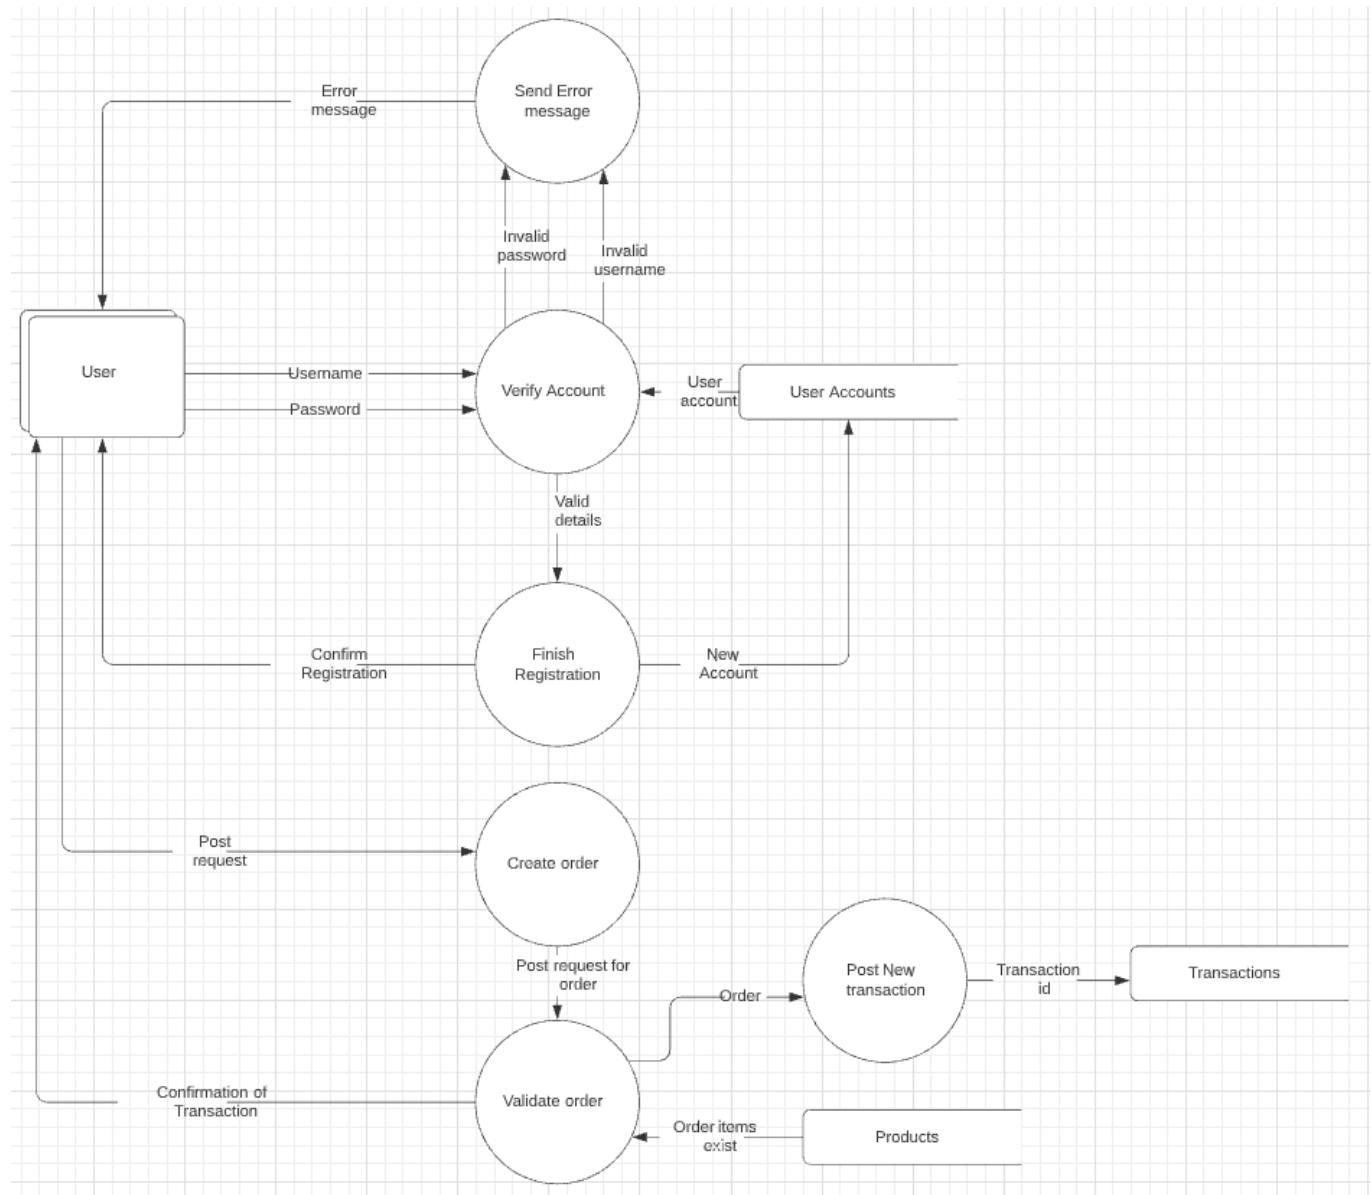

Database: MongoDB, Mongoose

REPL & Server: Node.js, Express.js

Frontend: HTML, CSS, and React.js

Dataflow Diagram

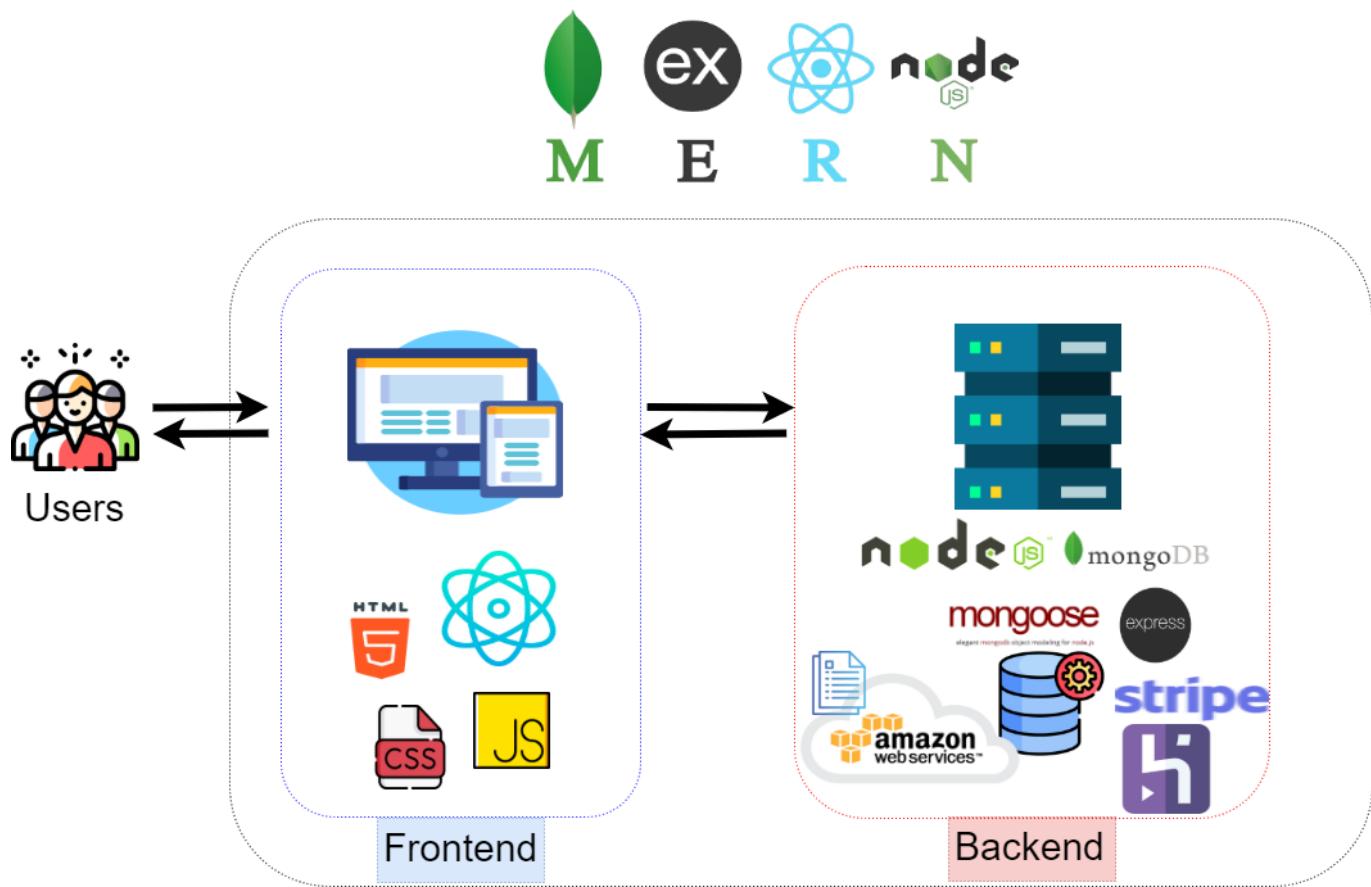

Our dataflow diagram outlines the process of registering a user as well as sending request to create a transaction within the server.

User Stories

As an Admin, I would like secure my website from malicious attacks. So I can restrict access to change information of the shop index.

Given that the Admin has entered the correct account details. When the account holding the admin status is signed in, Only then, products can be added to be sold, deleted, and/or edited.

As an Admin, I want to display a description of a product. So I can advertise the selling item with the corresponding details.

Given that the Admin is signed in, When the link option to add an item is clicked, A form to advertise a product is rendered.

As an Admin, I would like to attach a photo of the selling product. So that I can advertise the exact item being bought.

Given that the Admin has filled out the form to add a product. When the upload image button is clicked, The product is advertised with the photo set.

As a User, I want to an easy access to my account settings, So that I can make necessary amends if needed in the future.

Given that the User has clicked the link to their profile. When changes are made within the account form is saved, Only then information changed by the user is updated.

As a User, I want a list of products being sold, So that I can choose to buy what is available.

Given that the user is on the root page, When the index is selected, Then all available products are displayed.

As a User, I want a record of the products being selected. So I can specify the amount of a product desired before purchasing.

Given that the User is registered, When the link is clicked to add to cart, Then the desired amount of an item is added to User's order list.

Sue

Sue, 35, is a chef of a popular restaurant in the Inner-West of Sydney. With a rising demand of her 'Sticky Asian Wings', Sue needs to buy honey in large quantities every week depending on the fluctuating trend of her sales.

Joseph

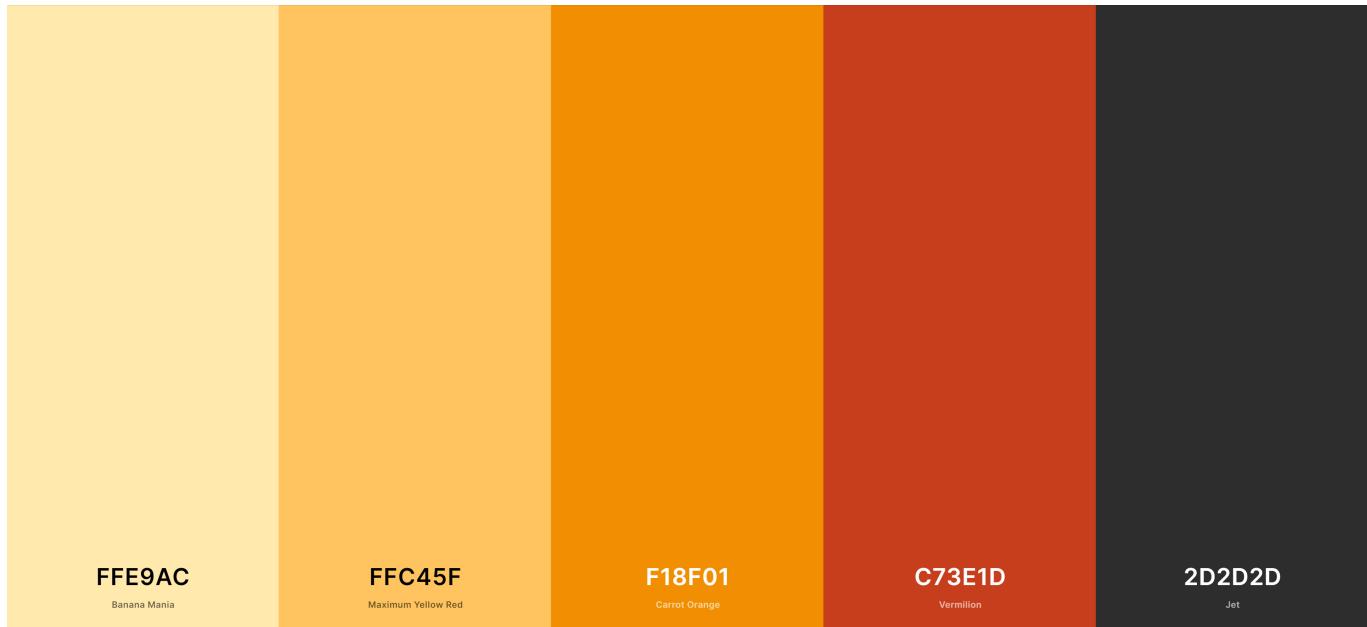

Joseph, 33, owns a small takeaway cafe nearby a busy train station. Enthusiastic with trying new things, he begins selling a new coffee called the 'bees neez'. To survive the week, Joseph uses 2 jars of honey and restocks with the same amount.

Mason

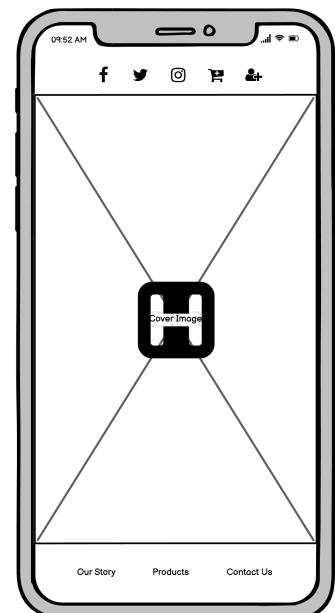

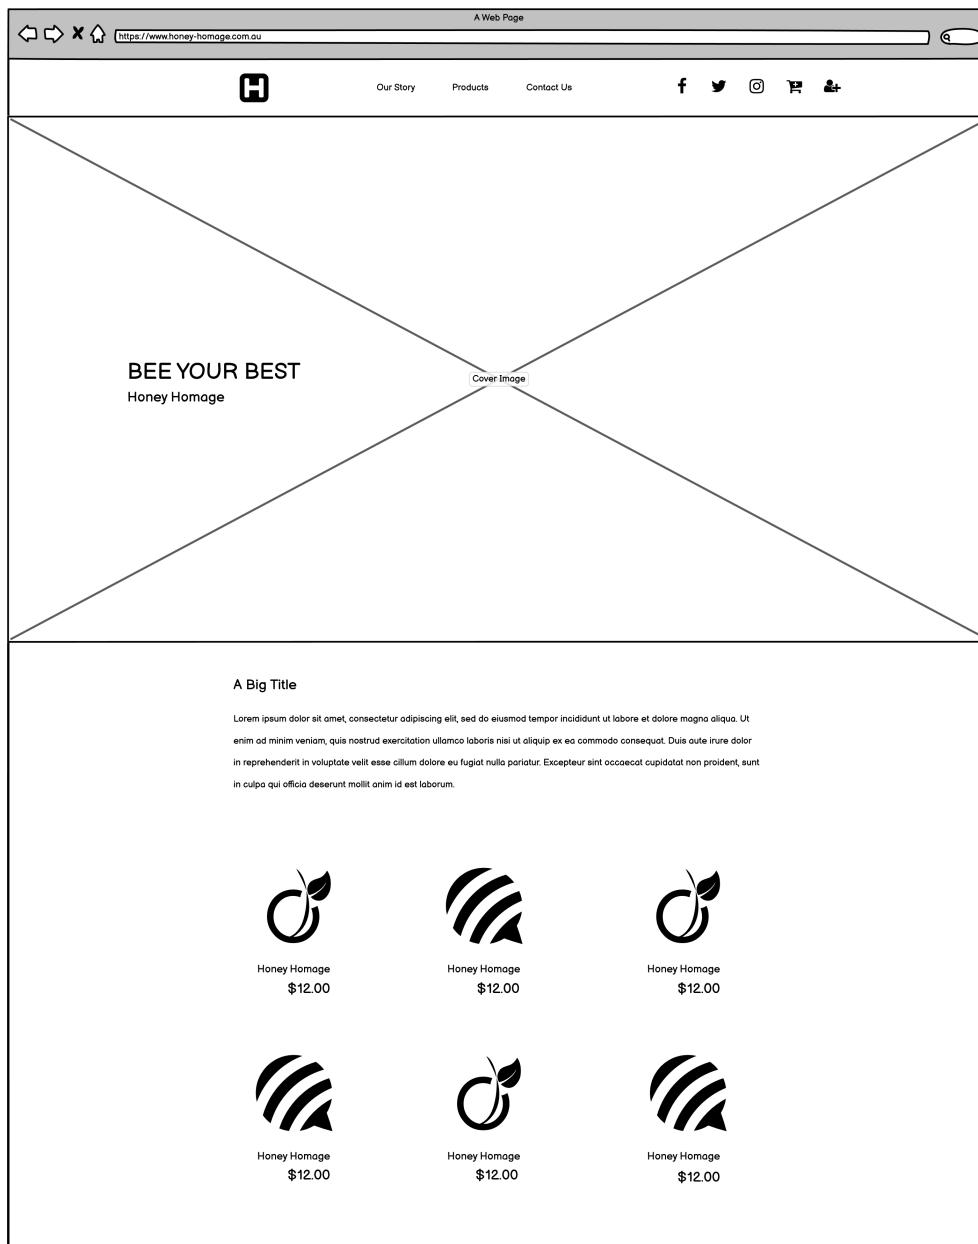

Mason, 71, is a kind hearted, long time resident of the land down under. As a retiree, Mason loves to catch up with reading the newspapers in the morning. Invested in the story of the 2020 bushfires, he would like to contribute in helping those recovering any way he can.

- Project Part A and Part B Plan

This screenshot shows a Trello board titled "HoneyHomage_CodingPowerBuddies". The board is organized into several lists:

- WorkBook A**: Contains cards for "Purpose | Andrew", "Functionality / Features | Andrew", "Target Audience | Horacio", "Tech Stack | Andrew", "DataFlow | Soni", "Architecture Diagram | Horacio", "User Stories | Soni", "Wireframes | Andrew", and "Trello | Andrew".
- Backend**: Contains cards for "Node", "Express", "Sequelize", and "MongoDB".
- Frontend**: Contains cards for "ReactJS", "UI / UX", and "Styling / Sprinkles".
- Deployment**: Contains cards for "Heroku Deployment" and "+ Add another card".
- Features**: Contains cards for "Auth0", "Buyer Login & Checkout", "Admin Login & Special Abilities", and "Beautiful UI".
- Branding**: Contains cards for "Logo | Horacio" and "+ Add another card".
- Soni Daily Planner**: Contains cards for dates from 22/01/2020 to 31/01/2020, each with a "+ Add another card" button.
- Horacio D**: Contains cards for dates from 22/01/2020 to 31/01/2020, each with a "+ Add another card" button.

- Project Team Member Daily Planner

This screenshot shows a Trello board titled "HoneyHomage_CodingPowerBuddies" with a focus on the "Daily Planner" section. The board includes the following lists:

- Deployment**: Contains cards for "Heroku Deployment" and "+ Add another card".
- Features**: Contains cards for "Auth0", "Buyer Login & Checkout", "Admin Login & Special Abilities", and "Beautiful UI", each with a "+ Add another card" button.
- Branding**: Contains cards for "Logo | Horacio" and "+ Add another card".
- Soni Daily Planner**: Contains cards for dates from 22/01/2020 to 31/01/2020, each with a "+ Add another card" button.
- Horacio Daily Planner**: Contains cards for dates from 22/01/2020 to 31/01/2020, each with a "+ Add another card" button.
- Andrew Daily Planner**: Contains cards for dates from 22/01/2020 to 26/01/2020, each with a "+ Add another card" button. This list also includes items such as "Trello Board", "Wireframe", "Learn Sequelize CRUD", "Learn MongoDB", "Learn Relationships", "Learn React", "Presentation", and "MEN Stack Team Build".

- Team Update: Initialising Progress

The screenshot shows a Trello board titled "HoneyHomage_CodingPowerBuddies". The board is organized into several lists:

- Frontend**: Contains cards for ReactJS, UI / UX, and Styling / Sprinkles.
- Deployment**: Contains a card for Heroku Deployment and a "+ Add another card" button.
- Features**: Contains cards for Auth0, Buyer Login & Checkout, Admin Login & Special Abilities, and Beautiful UI, each with a "+ Add another card" button.
- Branding**: Contains a card for Logo | Horacio and a "+ Add another card" button.
- Soni Daily Planner**: A vertical list of tasks from January 22nd to 31st, 2020, each with a "+ Add another card" button.
- Horacio Daily Planner**: A vertical list of tasks from January 22nd to 29th, 2020, each with a "+ Add another card" button.
- Andrew Daily Planner**: A vertical list of tasks from January 22nd to 29th, 2020, each with a "+ Add another card" button.

The interface includes a header with "Boards", search, and user info, and a sidebar with "Butler" and "Show Menu".
